NEW TRANSIT STATION COMING TO SANTA CLARA!

Improved safety and access

Lane Transit District (LTD) is developing a new transit station located at the former Santa Clara Elementary School site. The station will be occupying the area on River Road between Green Lane and Hunsaker Lane in Santa Clara.

LTD purchased the 8-acre, bank-owned property in 2015 with the intention of relocating its current transit station from River Road just south of Beltline. The current station experiences several congestion points making access more difficult and less safe.

The design of the new station addresses many safety and accessibility challenges, provides better bus maneuverability, and safer pedestrian access.

Buses will enter through a bus-only lane off River Road and pull through the new station along a one-way road exiting onto Green Lane. A new traffic signal will allow buses and other traffic to make timely right or left-hand turns onto River Road.

The Santa Clara Transit Station will serve routes 51, 52, and 55 with the addition of a bay exclusively for RideSource, LTD's ADA service.

Other features of the new station will include a driver relief building, bioswale landscaping, and a Park & Ride lot.

Currently, LTD is in the first phase of public engagement, with a public launch of the project that took place in December at several community

meetings. Members of LTD staff, along with members of the design team from Rowell Brokaw, unveiled the design concepts and heard feedback from neighborhood residents about the project.

Construction is scheduled to begin in spring of 2020 with the station opening for service in early 2021.

To learn more about the new Santa Clara Transit Station, or to find out about upcoming public meetings about the project, visit: LTD.org/santa-clara-transit-station/.

DID YOU KNOW?

EmX departures

Running a little late and the EmX doors are already closed? When it comes to EmX, there are times that procedures and safety concerns prevent a bus operator from re-opening the doors for riders who arrive a little late. LTD bus operators work hard to offer the best customer service for riders whenever possible.

FRANKLIN BOULEVARD ENHANCEMENTS

Better for the community

As Eugene grows and transforms, so do its transportation needs. In partnership with LTD, the City of Eugene has begun a project to redesign Franklin Blvd. between Alder St. and I-5, to better serve the needs of all members of the community.

To help the City of Eugene develop this new vision for Franklin Blvd., you are encouraged to attend a series of events during the last week of January.

City of Eugene staff will be asking for specific input about the needs and desires of the community for Franklin Blvd.

Monday, January 28, 6:00 p.m. – 7:30 p.m.
Ford Alumni Center, 1720 E 13th Ave.

City of Eugene staff will be working through design options based on the community feedback provided at prior meetings.

Tuesday, January 29, 4:00 p.m. – 7:00 p.m.
2020 Franklin Blvd., Eugene

The city will reveal how Franklin may look and share next steps for the projects.

Thursday, January 31, 6:00 p.m. – 7:30 p.m.
1625 E 13th Ave., Eugene

If you are unable to attend these events, you will have the ability to provide feedback online or over the phone. For more information, go to: www.eugene-or.gov/Franklin or call (541)682-6887.

A NEW WAY TO GET AROUND COTTAGE GROVE!

LTD is pleased to offer shared ride services by bringing a new pilot curbside service to Cottage Grove. An ADA LTD vehicle will provide transportation to a destination within Cottage Grove Monday through Friday, from 7:00 a.m. to 7:30 p.m. Call-in requests for arrangements will need to be made between 8:00 a.m. – 5:00 p.m. Saturday and Sunday will remain unchanged and LTD's regular Route 98 will be in operation for the time-points on page 84 of the Rider's Digest.

Download the mobile app on your smartphone!
(Look for "MicroTransit" in the app store.)

OR

Schedule your ride online:
TransLoc.com

OR

Schedule your ride by calling:
541-942-0456 ext. 1

\$1.00/ride or other LTD fare accepted.

For more information go to LTD.org/Connector.

This pilot program will operate only within the Cottage Grove city limits and will run from January 14, 2019, through February 2, 2020. Continued service will depend on the service results of the shuttle during this time-frame.

Due to the height of the EmX, boarding and de-boarding must happen at the platform, with a safe distance between the bus and the platform. If an EmX has moved from the platform even slightly, doors must remain closed for safety reasons.
